The following is an examiner's statement of reasons for allowance: all claims (1-5) are allowed over the prior art of record because none of the reference shows the specific claimed combination of a layout of a wireless communication circuit on a PCB having the claimed four sides, the X-axis, the Y-axis, the first and second antennas, the antenna switch, the first and second filters, the RFIC, the first and second regulators, the MAC, the global oscillator, the signal pins, the power amplifier, the T/R switch, and their respective positions with respect to the layout of the PCB.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

PTO-892: Ishida shows a T/R apparatus and a circuit layout.
